

CATALOGUE

2026

DEAR CUSTOMERS

After a 2025 marked by the launch of numerous new styles and colours, developed to meet the demands of the market, we begin 2026 with a different but equally essential purpose: to strengthen the foundations that sustain the future of TH Clothes.

This year will mark an important milestone in our history. In the coming months, we will complete the construction of our new logistics center, which will increase our storage capacity by an additional 20 million items. At the same time, we will implement more modern and efficient management systems, enhancing our agility and responsiveness.

The strength of TH Clothes, however, goes far beyond infrastructure. Since 2006, our work has been guided by rigor, quality, and responsibility. Year after year, we have expanded our international presence, and today we are already present in more than 30 countries. We will continue to grow sustainably, consolidating the brand not only through our products but also through our values.

Innovation is not only about creating new products, but also about perfecting every detail of what we already do well. That is why we work every day to improve our products, deliver excellent service, and build relationships with our clients based on trust.

In 2026, we want to continue growing side by side with you, because achievements become even more meaningful when shared with those who have been part of our journey.

Best regards,

Mauro Silva
CEO

A scenic landscape featuring a calm lake in the foreground. A wooden Adirondack chair sits on a small dock in the lower-left corner. The water reflects the sky and the surrounding greenery. In the background, a lush, forested hillside rises, with a small wooden platform visible on the water's edge. The sky is clear and bright, suggesting a sunny day. The overall mood is peaceful and serene.

TH CLOTHES

2026

THIS IS OUR CULTURE

Today our vision is a reality. The Better Cotton Initiative (BCI), or simply Better Cotton, is the largest cotton sustainability program in the world. In just over a decade, BCI has managed to convince stakeholders that span the sector to be its partners, namely, farmers, ginners, spinners, suppliers, manufacturers, brand owners, retailers, adding now more than 2,300 members in the Better Cotton network.

TH Clothes has always taken on a huge commitment with the quality of its products. Proof of this is obtaining the Standard 100 by OEKO-TEX® certificate, which aims to guarantee the use of regulated substances free from health hazards. Obtaining this certificate is a worldwide synonym that ensures responsible textile manufacturing, and consequently, represents a guarantee for industry, commerce and consumers.

The GRS seal is an in-depth certification that not only guarantees the recycled content of the product (minimum: 20%), but also ensures a sustainable production, the absence of harmful chemicals and ethical working conditions. This international product standard was created by Certifications Control Union in 2008 and is currently owned by Textile Exchange.

The Recycled Claim Standard (RCS) is a voluntary international standard that establishes requirements for third-party certification of recycled content and chain of custody. The goal is to increase the use of recycled materials. The RCS reference does not address the use of chemicals or other social or environmental aspects of production beyond the integrity of the recycled material. RCS is based on chain requirements Content Claim Standard (CCS) custody.

In order to ensure working conditions for people in the ready-made garments industry and to avoid incidents in the countries where we purchase our products, TH Clothes considered essential to become a member of the International Health and Safety Agreement in Textile and Clothing Industry (International Agreement).

This agreement is legally binding between clothing brands and unions, with the aim of making textile factories safer. TH Clothes thus takes extreme care with the working conditions of all those who contribute to the production of its products, provides all the necessary guidelines to ensure safety throughout the production process. In this way, TH Clothes, in partnership with Bangladesh suppliers, ensures that all measures are being taken to build a better future for the clothing business.

The FAIR COTTON and ECO FRIENDLY labels on our products are a testament to our firm commitment to sustainability. The FAIR COTTON label ensures that we use cotton grown responsibly, improving farmers' conditions and respecting the environment. Meanwhile, the ECO FRIENDLY label reflects our dedication to reducing our environmental footprint, whether through recycled materials or supporting conservation initiatives. These labels represent a solid and ongoing commitment to a more sustainable future for all.

We are currently experiencing a worldwide appeal for a more active and intense awareness of packaging, so, the brand has increasingly invested in the use of biodegradable materials, such as cardboard. This time, a program was created to reuse all shipping packaging, in order to minimize waste and ensure responsible use.

The DNA of the Portuguese people is widely recognized in the textile world. Its success story dates back to the 16th century with the construction of the sails used by Portuguese ships. Since that time, the quality of construction and the design of Portuguese brands is appreciated all over the world, so these were the bases that contributed to the fact that, nowadays, Portuguese textiles mean flexibility, speed, consolidated knowledge and innovation. Based on these premises, TH Clothes continues to invest heavily in the quality of its products and in the expansion of its ranges, always with the vision of a future marked by differentiation and added value at the most diverse levels.
